

thinLUX™ UnderBody Light™ is the most rugged, brightest, thinnest profile light available. It is designed to light up the ground around a vehicle and take all of the abuse that the life of a hard working utility truck can throw at it. Packaged in a low profile aluminum extrusion its metal bushings allow it to be easily, securely, and safely bolted to the vehicle's undercarriage. Its bright 36-LED array is potted and protected in two layers of urethane - white and clear. For crews working during the dark hours thinLUX UnderBody Light will help them find dropped parts quickly keeping them productive and focused on the tasks at hand.

Part No.	Description
UB750-6PWHD	UnderBody Light
Dimensions	.156" x 1.875" x 8.0" (bushings are .1875"ID and 7"O.C.)
Lumens	750
